

Disable SWAG Default Page

Tuesday, July 15, 2025 10:01 PM

To disable SWAG's default landing page open edit the following file

/config/nginx/default.conf

Under the **server block**, edit comment out or remove the following line

```
index index.html index.htm index.php;
```

Under the first **location / block**, comment out or remove the following line then restart SWAG.

```
try_files $uri $uri/ /index.html /index.htm /index.php$is_args$args;
```

```
13 # main server block
14 server {
15     listen 443 ssl default_server;
16     listen [::]:443 ssl default_server;
17
18     server_name _;
19
20     include /config/nginx/ssl.conf;
21
22     root /config/www;
23     # index index.html index.htm index.php;
24
25     # enable subfolder method reverse proxy confs
26     include /config/nginx/proxy-confs/*.subfolder.conf;
27
28     # enable for ldap auth (requires ldap-location.conf in the location block)
29     #include /config/nginx/ldap-server.conf;
30
31     # enable for Authelia (requires authelia-location.conf in the location block)
32     #include /config/nginx/authelia-server.conf;
33
34     # enable for Authentik (requires authentik-location.conf in the location block)
35     #include /config/nginx/authentik-server.conf;
36
37     location / {
38         # enable for basic auth
39         #auth_basic "Restricted";
40         #auth_basic_user_file /config/nginx/.htpasswd;
41
42         # enable for ldap auth (requires ldap-server.conf in the server block)
43         #include /config/nginx/ldap-location.conf;
44
45         # enable for Authelia (requires authelia-server.conf in the server block)
46         #include /config/nginx/authelia-location.conf;
47
48         # enable for Authentik (requires authentik-server.conf in the server block)
49         #include /config/nginx/authentik-location.conf;
50
51         # try_files $uri $uri/ /index.html /index.htm /index.php$is_args$args;
52     }
53
54     location ~ ^(\.+\.php) (.*)$ {
55         # enable the next two lines for http auth
56         #auth_basic "Restricted";
```
